Art Unit: 3764

Claims 3-31, 33-36, 40-42 and 44-46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 37 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Taylor.

Taylor discloses a locomotion device comprising a harness (11) leg braces 10 and 12 extending from the harness to the ground, a hip pivot (10a), brace feet (7) and foot couplings (6).

In regard to claim 2 note elements 4, 9, 20 and 21.

In regard to claims 37 Taylor discloses a tightening mechanism in the form of a strap and buckle which in combination change the circumferential length of the harness and therefore the gripping force of the harness.

The limitations of claim 38 are met by the tightening mechanism of Taylor as mention in the rejection of claim 37 above which is intrically and inherently more adjustable.
